Dramatic inky black and crisp white is a combination that guarantees a real wow factor, elegant and enduring yet transcending period and price.

A look as simple as black and white can't be that hard to master can it? Not if you establish some ground rules first.

Black and white can be the overall theme or just a dramatic accent. The trick is to keep it simple and sleek using texture, pattern or layering to add detail.

To add some instant sitting room drama go for the high-backed Marco sofa in comfy black leather. Or for an ultra modern dining room opt for the sleek glass-topped table and funky chairs of the Monaco collection.

Don't be afraid to mix dramatic white furniture with black pieces such as the Mountain shelving unit - practical - and a real style statement!

And why not head into Fishpools' accessories department for statement pieces to add to the visual impact?

Give it a go . . . visit Fishpools to see how black and white could work in your home.
